FOREWORD

This publication, **MBS STANDARDS WORK PROGRAMME**, contains a list of standardization projects that are in progress within the Malawi Bureau of Standards (MBS), the National Standards Body for Malawi.

Formulation of Malawi Standards is carried out by the Standards Development Department through Technical Committees, which are grouped under three Technical Divisions, namely, Chemicals and Textiles Division, Engineering and Materials Division, and Food and Agriculture Division. The standards development process involves information search (literature review), drafting, circulation of draft standards to experts for comments, and discussion of the draft standards in Technical Committees at various stages before these are approved as Malawi Standards by the Malawi Bureau of Standards Board.

The **MBS STANDARDS WORK PROGRAMME** is published twice a year. A list of all published standards is contained in a separate publication, **CATALOGUE OF MALAWI STANDARDS**, published annually. This MBS standards work programme also contains a list of Malawi Standards that have been printed during the preceding six months.

HOW TO USE THE PUBLICATION

GENERAL

The standardization projects contained in this work programme have been categorized according to specific technical fields corresponding to the Standards Development Divisions of the Malawi Bureau of Standards. These technical fields (divisions) are:

1. Chemicals and Textiles;
2. Engineering and Materials; and
3. Food and Agriculture.

Reference for a particular project should be made under the relevant field. The listing of the project under each field is in numerical order.

The work programme has been presented in seven (7) columns as follows:

1. **Standardization project number**

This is the number under which the project has been registered. The following two notations are used:-

- i) **DMS**, followed by a number and year, for a project under development for the first time; and
- ii) **MS**, followed by a number and two years (with one year in bracket). This shows that the standard is undergoing revision.

In the case of the **DMS** notation, the year stands for the year of registration of the project and for **MS**, the first year indicates the year in which the document was first published as a Malawi Standard, and the year in brackets indicates the year in which the standard was registered for revision.

**NOTE: DMS stands for Draft Malawi Standard.
MS stands for Malawi Standard.**

It should also be noted that the project number is used as reference to the standard under development, and that the document retains the same number when the document becomes a Malawi Standard. However, the notation changes from DMS to MS followed by a year in which the draft standard was approved as a Malawi Standard.

2. **Title**

This column gives the title of the standardization project.

3. **Edition**

This column gives the status or edition of the project. For illustration purposes, **1** indicates that the standardization project is new (in its preparatory stage for the first edition), **2** indicates that the document is undergoing the first revision (for its second edition), **3** indicates that the document is undergoing the second revision (for its third edition), etc.

4. **International relatedness**

This column indicates the relatedness of the standardization project to an international standard (National relatedness is also indicated in some cases).

5. Stage number

For monitoring of project development, table on the next page shows a numerical representation of the main stages involved. A project is registered as having reached a particular stage when the action or decision indicated at that point has been taken.

6. Stage date

The stage date is the date on which the action or decision for a project to have reached a particular stage (see 5) was made.

7. Target date

A target date shows the year when the project is expected to be published as a Malawi Standard.
